## I. Letter to Shareholders

### 1. Business report for the 2011 fiscal year

#### A. Business plan and accomplishments.

Margin loans and stocks loans are the company's core business. The company upholds positive, reliable and efficient concepts to continue serving agency and consolidated securities firms and establish partnerships with agency. After Yuanta Securities run securities financing business by themselves. The company's agent business shrunk rapidly. There are no loss of business from a group perspective. Furthermore, it will be beneficial from company's business perspective. The agent broker's concerns about "fire wall" will be removed, At the same time the investors with substantial needs for securities financing are no longer bound by regulatory restrictions on "repeated account opening". Hence the company still has rooms to grow in the securities financing agency business. Our business accomplishments are as follows:

Unit: Hundred million NT\$

Average balance of margin loans and re-financing	Average balance of stocks loans and stocks re-financing (guarantee fund + margin)	Average balance of securities lending
219.54	26.83	12.23

#### B. Financial income and expenses / profitability analysis

In 2011, revenues decreased by 62.50%, operating income decreased by 63.51%, and operating cost decreased 70.08%. The main reason was YSF remised NT\$ 34,186,074,000 of securities margin and security loans business and securities lending business on Oct.18 2010. Due to the absence of gains on financial asset disposal, non-operating income and profit declined by 70.04%. Without asset impairments for the year, non-operating expenses and losses decreased by 95.49%. After-tax profit in 2011 was decrease by 58.83% compared to 2010, details are as follows:

Year	Total assets (thousand dollars)	Total income (thousand dollars)	Net income (thousand dollars)	EPS(NT\$)
2010	44,006,595	4,720,477	1,856,897	0.51
2011	19,740,002	1,706,960	764,442	0.75

#### C. Research and development

The company is continuing to implement an information platform and two stage cooperation program, strengthen securities trader information services, and engage in diversified business through a

franchise channel approach in conjunction with the group's diversified products, ensuring that The company agent services indirectly benefit.

## 2. Summary of business plan for the 2012 fiscal year

### A. Business plan

- (1) Stabilize current agency firms: It will rely on sales promotion activities and service packages supporting agents to strengthen the competitiveness of agents and consolidate its relationships.
- (2) Expand negotiable securities borrowing and lending services: Responding to the growth of derivative markets and increase in strategic trading, it will take proprietary securities traders as its main customer base, and may even extend towards foreign investors.
- (3) Introduce loans for rights issues and securities settlements etc: We will pursue this service under the appropriate timing, and thereby diversifying our source of revenues.
- (4) Create synergies within the financial holding group: Take the initiative in offering agency services to securities firms, such as reconsigned trading, futures introducing broker, settlement banking etc.
- (5) Strictly manage credit risk: It will reinforce risk control and implementation of a quota mechanism, ensuring that risk control and sales growth develop in parallel.

### B. Expected 2012 Business Status of Operations

Unit: Hundred million NT\$

Average balance of margin loans and re-financing	Average balance of stocks loans and stocks re-financing (guarantee fund + margin)	Average balance of securities lending
193.12	24.01	12

## 3. Future development strategies of the company

- A. We will urge the small self- financing providers to the agents actively or make mergers and acquisitions again to conduct the structural adjustment of market at the appropriate time.
- B. Because the role of securities financing company has been significant change in the market, we will strive for the opportunity of new business and deregulation.

## 4. Impact from external competitive environment, regulatory environment and overall operational environment

The latest trends in securities financing are that securities financing companies are being merged into various financial groups, and those who do not have the ability to acquire others begin their own securities finance operations. In 2011, there are one agency end up brokerage business for individuals, one agency run securities finance operations by themselves, and one agency merged by another securities company. All these developments will affect the company's market share.

**Yuanta Securities Finance Co., Ltd**  
Declaration on Internal Control System

Date: February 29, 2012

The declarations of the self-inspection result of the company's internal control system between Jan. 1, 2011, to Dec. 31, 2011, are listed below:

1. The internal control system establishment, implementation and maintenance are the duty of the board and managers. The system has been established to ensure the achievement of operating efficiency (including profit, performance and safeguarding asset security), reliability of financial reports and the observance of relevant regulations, etc. objectives.
2. The internal control system has its inherent limitations. No matter how well designed it is, the effective internal control system is only able to provide reasonable guarantees for the three above mentioned objectives; moreover, due to the changes of environment and situations, the effectiveness of the internal control system may change as well. The company's internal control system has a self-monitoring mechanism, therefore, when the mistakes are identified, the company will immediately take corrective actions.
3. The company uses the *Securities and Futures Market Internal Control System Guidelines* (SFMICS Guidelines) to regulate the judgmental items for the effectiveness of the internal control system. The judgmental items that *SFMICS Guidelines* use have divided the internal control system into five elements according to the management control process, which are: 1. Control environment, 2. Risk assessment, 3. Control operation, 4. Information and communication, and 5. Supervision. Each element also includes various items. (Please refer to the regulation of *SFMICS Guidelines*.)
4. The company has used the above mentioned internal control system judgmental items to inspect the effectiveness of the internal control system design and implementation.
5. Based on the inspection results, the design and implementation of the company's internal control system is effective. (The internal control system includes the monitoring and management of the subsidiaries.)
6. This declaration will be included in the annual report and the prospectus for perusal by the public. Any false statement or concealment in the said documents will be a violation against *Articles 20, 32, 171, and 174 of the Securities Exchange Act*.
7. This declaration was approved by the board on February 29, 2012; none of the 5 attending directors had negative opinions.

#### F. Dividend policy and implementation status

##### (1) Company dividend policy

The company has adopted a balanced dividend policy to uphold shareholder rights and achieve long-term business sustainability goals. The total proposed dividend by the board of directors in principle may be 80% to 100% of net earnings for the year following payment taxes, amendment of losses, allocation of legal reserve, director(s) and supervisor(s) remuneration and employee

bonuses. The cash portion of the dividend shall make up 50% to 100% and stock portion of the dividend shall comprise 50% or less of the total dividend distributed.

Regarding the aforementioned principle, the company will decide the most appropriate policy for the distribution of stock dividends depending on actual profitability and capital conditions accordingly. The board will prepare a proposal for such distribution plan and submit it to the shareholders' meeting for approval and execution.

(2) Implementation status

Shareholders were allocated cash dividends NT\$0.73 per share.

G. Impact on company financial results and EPS due to the issuance of bonus shares as proposed in the shareholders' meeting:

None

H. Employee Bonuses and remuneration to director(s) and supervisor(s)

(1) The range of Employee bonuses and remuneration to director(s) and supervisor(s) as set forth in the Company's Articles of Incorporation :

Following the Company's Articles of Incorporation, if annual earnings surplus exists after tax payment, amendment of losses from previous years shall take place than allocation of 30% for legal reserve. Of the remaining amount, 0.1% - 0.5% shall be appropriated as bonuses to employees. The remaining amount is combined with undistributed earnings from previous years and a distribution proposal by the Board of Directors is submitted to the Shareholders Meeting for approval.

(2) The accounting treatment of the discrepancy for the current period, if any, between the actual distributed amount and the estimated figure (for estimating the amount of employee bonuses and director/supervisor compensation, and calculating the number of shares to be distributed as stock bonuses) :

The basis for estimating the amount of employee bonuses is deducted allocation of legal reserve from annual net income, and multiplied by percentage in accordance with the Articles of Incorporation and related regulations. The estimates of employee bonuses are recognized as current period's operating expenses. In case of the difference in employee bonuses between the resolution of shareholders' meeting and the estimation, the estimation difference will be regarded as the profit and loss for the next year.

(3) Employee Bonuses approved by the board of directors:

(a) Employees were allocated cash rewards totaling NT\$1,163,659 The Board meeting.

(b) Proposed stock bonus to employees and its percentage of total capital increase from earnings:  
No stock bonus was allocated to employees.

(c) Earnings per share after proposed allocation of bonus to employees and remuneration to director(s) and supervisor(s): Aim for NT\$0.75 EPS after proposed allocation.

- (4) Information regarding the allocation of earnings from the previous year for bonuses to employees and compensation to directors and supervisors:

There was no discrepancy between the employee bonuses and the amount allocated from the Company's 2010 earnings as passed by the board of directors (acting as proxy for the AGM) and the actual amount paid out. Cash bonuses paid to employees amounted to NT\$4,159,450.

##### (3) New financial products and service under reasearch

In order to utilize its securities finance collateral assets, and energize the recirculation of negotiable securities, the company will urge the authorities to approve the negotiable securities collateral financing. It will meet investors' need for short-term or small amounts of funds.

#### B. Industry overview

##### (1) Securities margin financing and security loans business

After acquiring the share financing/short sale businesses from the two securities finance companies, Entie and Fubon, The Company was able to increase its market share in securities agency services from 55% to 75%.Margin trading and short sale services are currently still Yuanta Securities Finance's core business areas; it will continue to serve agents with a vigorous, reliable, and efficient attitude, and establish collaboration partnerships with agents, achieving a win-win outcome.

##### (2) Refinancing business

Refinancing services are chiefly aimed at securities traders, and not ordinary investors. Due to the relaxed funds market in recent years, securities traders have increased their capital, which has sharply reduced the need for refinancing from securities finance companies. As for stock

loans to brokers, this accommodation provides stocks to securities traders so that they can make financed sales or repay shares, and is not a source of financing shares for short sale by securities trader investors. As a consequence, its balance of stock loans to brokers has always remained low. Refinancing business accounts for less than 1% of The Company 's overall business.

(3) Securities settlement financing

Financing has been expanded to foreign natural person and foreign institution organizations, and the amount of financing ranges up to a maximum of NT\$1 billion. Because of low demand from investors, Yuanta Securities Finance currently has no balance for this service item.

(4) Securities lending

In line with the financial holding group's strategic planning, Yuanta Securities is taking back responsibility for business it has uncovered, and Yuanta Securities Finance's business has shrunk. This service now accounts for 2% of Yuanta Securities Finance's revenues, down from the previous 7%. Yuanta Securities Finance will focus on servicing proprietary securities traders in the future, and may explore new foreign customers.

(5) Cash replenishment and underwriting subscription loans

The demands for this type of financing have been weak due to the lack of willingness in subscriptions have resulted in no balance yet for this business.

C. Technology and R&D

The Company is continuing to implement an information platform and two stage cooperation program, strengthen securities trader information services, and engage in diversified business through a franchise channel approach in conjunction with the group's diversified products, ensuring that Yuanta Securities Finance agent services indirectly benefit.

D. Long-term and short-term business development plans

Responding to fast-changing domestic and foreign economic and financial trends, and attempting to secure a competitive advantage in the securities finance market, The Company will focus on the following key services and development items in the future:

- (1) Raising margin loans and stock loans market share and achieving maximum benefit for this company: The company will take advantage of its nearly 75% market share to embark on diversified operations including information and channel franchises, while blocking price-cutting competition by rivals. This will boost the company's share of the margin trading and short sale market, and maximize performance for the company and its customers.

- (2) Promotion of securities lending business:

- (a) The emergence of derivatives trading has given rise to new arbitrage and hedging needs. In

addition to establishing customer relationships with proprietary securities traders, we may also engage new foreign institutional investors given the level of globalization that Taiwan's stock market has achieved.

(b) We will also be looking for new sources of securities to lend, apart from using the collaterals from investors' financed share purchases.

(3) Proposing deregulation:

Cooperation with the Taiwan Securities Association, the company will propose the elimination of restrictions on "provision of margin trading and short sale services while receiving stocks from a parent company as collateral," which will void the applicability of the regulation "when a parent company holds more than one-half of capital or total shares possessing voting rights of a subsidiary, the subsidiary may not buy or accept as collateral the shares of the controlling company" in Article 167, Paragraph 3 of the Company Act.

## **2. Market and business Overviews**

### **A. Market analysis**

(1) Supply, demand conditions, and growth potentials

After securities firms were granted permission to engage in stock market security financing business in 1990, the investor population and number of people opening margin loans accounts increased significantly due to the increase of credit agency institutions. The scale of market transactions and margin loans transactions also expanded rapidly. As of 2011, there are 35 consolidated securities firms and 2 security finance firms engaged in the security financing business. Looking at domestic securities market, the total stock market turnover in 2011 was NT\$ 26.1974 trillion with over 650.9 billion shares traded. At the end of 2011, the market securities margin financing balance was NT\$ 195.7 billion, the security loans balance was 707.59 million shares, and the company's year-end market share of security loans was 6.66% and the market share of security loans was 3.95%. In 2011, the OTC annual stock turnover was NT\$ 3.9930 trillion, and the total volume was 98.4 billion shares. At the end of 2011, the OTC securities margin financing balance was NT\$ 34.8 billion and the security loans balance was 91.55 million shares. The company's year-end security margin financing market share was 7.05% and market share of security loans was 4.04%.

(2) Competitive niches

(a) Utilize financial holding synergy: Synergies may be created between the company's businesses and the various subsidiaries in the financial holding group. As the blueprint for the financial holding company takes shape, strategies of overall resources may be put to use, service functions can put to full effect. By expanding overall marketing channels across businesses, the company can stay on top of the pulse of the time and seize financial

opportunities.

- (b) Reduce operating cost: Operation costs may be reduced by streamlining of personnel and distribution of costs throughout the group.
- (c) Strictly control credit risks: Implementation of effective and strict risk controls can raise credit quality and prevent bad debts.
- (d) Develop outstanding reputation and professional level of service: The Company was the first domestic securities finance company in Taiwan's securities market. Through the experience accumulated in financial practices and marketing networks, the company can provide safe and reliable services for the investors credit transactions. Our sincerity can win the trust of customer and forever safeguard the long-term interests of customers.

(3) Advantages and disadvantages for future development and response measures

(a) Advantages

- (i) More sufficient stocks source than other securities finance companies: the company has 75% market share, and owns more sufficient stocks source compared with other security finance companies and is in a position to offer more stocks for agency dealers, and investors to short sale.
- (ii) Diversified business service: People are paying more attention to financial planning. The company can greatly enhance its competitiveness through offering a diverse range of services and leveraging the combined resources of the group.

(b) Disadvantages

- (i) Trend for agency securities companies to set up independent security financing businesses by themselves:  
  
As market skewed towards the needs of economy of scale, many agency securities companies have been acquired or established their own independent security financing business which has led to decline in the agency business. As of the end of 2011, consolidated securities firms' share of the security finance business reached 91.04%.
- (ii) Fierce competition between securities finance companies: The fierce competition between security finance companies not only reduces interest spreads but also increases management and business promotion costs.

(c) Response strategies

- (i) Consolidated security firms: Consolidated security firms with smaller scale are restricted by their small equity value and lack of security sources resulting in difficulties to expand their credit transaction volumes. The company can leverage its current advantage to assist them to turn into agency securities firms. This can reduce their risk and also increase their business volume and earnings.
- (ii) Agency securities firms: Not following the price cutting competition with other securities

finance firms, instead the company provides professional service, information, adequate source of securities, outstanding risk control, and stable operations to make Yuanta Securities Finance the only choice for agency securities firms.

### 5. Labor Relations:

A. Employee welfare measures and implementation, labor agreements and safeguarding of employee interests

#### (1) Retirement plans and pension funds

Following the establishment of the company in 1980, pension and severance measures were adopted and approved at the fifth board meeting of the first term to fully safeguard employees' interests. The employee pension fund management committee, formally established in March 1981, is made up of nine members who are in charge of managing the pension funds, retirement, severance, death or resignation matters in accordance with regulations. On March 1, 1998, the company revised their retirement and severance regulations in line with the Labor Standards Law. A "Pension Fund Supervision Committee" was formed and contributions to the pension fund were set at a monthly rate of 8% of salaries and wages paid. This fund has been reported to the competent authority "The Taipei City Bureau of Labor". The original employee pension fund management committee is in charge of the management and use of the chairman and management pension funds which is disbursed at the same rate as regular employees.

On July 1st, 2005, with the pass of Labor Pension Act, new pension system went into effect. Under the new system, the company is obligated to contribute no less than 6% of monthly paid salaries into pension accounts with the Labor Insurance Bureau which established a more comprehensive and diverse corporate pension system.

(2) Employee welfare measures

The Employee Welfare Committee was formed when the company was first founded. An employee welfare fund was also established in accordance with regulations and corporate capital. Each month, the operating revenue of the company is allocated to the employee welfare fund. This fund is placed under the independent custody of the Employee Welfare Committee. Assistance is also provided to employees to set up beneficial clubs and encourage long-term saving. An employee stock holding association was established in Nov. 2000, which purchases the company's stocks in regular fixed amounts and protects employee welfares after employee retirement or departure from the company.

(3) Harmonious labor relations

As a financial service enterprise, the company revised personnel and work rules to conform to the Labor Standard Law and meet business operation and management requirements on March 1, 1998. Regular "Labor-management" meetings are held not only to safeguard employee rights or overall company interests, but also to include employee-friendly management concepts in each employee welfare program as well as foster communication of opinions, promoting safe and secure lifestyles and ensure harmonious interpersonal relations. Relations between management and labor have been good since the company was founded. There have been no major losses incurred from labor disputes. In 2005, there was one lawsuit concerning severance pay that resulted from a dispute between the company and one employee, Mao Hao-Hsing. The company paid the difference based on the court ruling which settled the case.

The ratio of operating profit, profits before tax to capital of 2011 was higher than 2010's. The reason was Approved capital decrease of NT\$20,300,000,000 and capital increase of NT\$3,800,000,000.-- transferred by legal reserve and additional paid-in capital, thus the total paid-in capital was decreased to NT\$6,000,000,000.-- from NT\$22,500,000,000.--.</li> </ol>							

Note 1: The financial data for the past five years has been audited and certified by CPAs.

Note 2: Calculation methods for the financial analysis are listed below:

Note 3: This ratio was not calculated due to the net operating cash flow minus cash dividend being negative in the statement of cash flows.

Note 4: Not applicable to the company

#### Calculation methods

##### 1. Capital structure ratios

- (1) Liability to Asset ratio = Total liabilities / Total assets
- (2) Long-term capital to fixed assets = (Total equity + Long-term liabilities) / Net fixed assets

##### 2. Liquidity analysis ratios

- (1) Current ratio = Current assets / Current liabilities
- (2) Quick ratio = (Current assets - inventory - prepaid expenses) / Current liabilities
- (3) Interest coverage ratio = EBIT / Current interest expenses

##### 3. Activity analysis ratios

- (1) Accounts receivable turnover (including account receivable and note receivable resulting from operations) = Net sales / Average accounts receivable balance for each period (including account receivable and note receivable resulting from operations)
- (2) Average cash cycle (days) = 365 / Accounts receivable turnover
- (3) Inventory turnover ratio = COGS / Average inventory
- (4) Payable turnover ratio (including account payable and note payable resulting from operations) = COGS / Average accounts payable balance for each period (including account payable and note payable resulting from operations)
- (5) Average period of sales (days) = 365 / Inventory turnover
- (6) Fixed asset turnover ratio = Net sales / Net fixed assets
- (7) Total asset turnover ratio = Net sales / Total assets

##### 4. Profitability analysis ratios

- (1) Return on assets = [Net profit (loss) + interest expense × (1 - tax rate)] / average total assets
- (2) Return on equity = Net profit (loss) / average total equity
- (3) Net margin = Net profit (loss) / net sales
- (4) EPS = (Net profit - dividend on preferred stock) / Weighted average outstanding shares

##### 5. Cash flow analysis ratios

- (1) Cash flow ratio = Net cash flow from operations / Current liabilities
- (2) Cash flow adequacy ratio = Net cash from operations over the past five years / (Capital expenses + change in inventory + cash dividends) over the past five years
- (3) Cash flow reinvestment ratio = (Net cash flow from operations - cash dividends) / (Gross fixed assets + long term investments + other assets + operating capital).

##### 6. Leverage analysis ratios

- (1) Operating leverage = (Net operating revenues - variable operating costs and expenses) / Operating profits
- (2) Financial leverage = Operating profit / (Operating profit - interest expense)

## Report of Independent Accountants

PWCR11000289

To the Board of Directors and Shareholders of Yuanta Securities Finance Co., Ltd.

We have audited the accompanying balance sheets of Yuanta Securities Finance Co., Ltd. as of December 31, 2011 and 2010, and the related statements of income, of changes in shareholders' equity and of cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the "Rules Governing the Examination of Financial Statements by Certified Public Accountants" and generally accepted auditing standards in the Republic of China. Those standards and rules require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Yuanta Securities Finance Co., Ltd. as of December 31, 2011 and 2010, and the results of its operations and its cash flows for the years then ended in conformity with the "Rules Governing the Preparation of Financial Statements by Securities Firms", "Business Entity Accounting Law", "Regulation on Business Entity Accounting Handling" and generally accepted accounting principles in the Republic of China.

As described in Note 5 to the financial statements, Yuanta Securities Finance Co., Ltd. entered into an agreement relating to the transfer of claim on margin loans and short sales of securities and on borrowing of securities with Yuanta Securities Co., Ltd. amounting to NT \$34,186,074 thousand. The effective date of the transfer was set on October 18, 2010.

February 29, 2012

- 2) The Company is primarily engaged in providing pecuniary and securities financing facilities for the trading of listed securities, refinancing to securities firms, financing of cash capital increase and underwriting and subscription, offering loans to securities firms for dealing with underwriting, financing of securities settlement, borrowing or lending securities, and other businesses as approved by the authorities.
- 3) The Company's parent company is Yuanta Financial Holding Co., Ltd.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements are prepared in accordance with the "Rules Governing the Preparation of Financial Reports by Securities Firms" and generally accepted accounting principles in the Republic of China. The Company's significant accounting policies are described below:

1) Foreign currency transactions

- A. Transactions denominated in foreign currencies are translated into functional currency at the spot exchange rates prevailing at the transaction dates.
- B. Receivables, other monetary assets and liabilities denominated in foreign currencies are translated at the spot exchange rates prevailing at the balance sheet date. Exchange gains or losses are recognized in profit or loss.
- C. When a gain or loss on a non-monetary item is recognized directly in equity, any exchange component of that gain or loss shall be recognized directly in equity. Conversely, when a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component

of that gain or loss shall be recognized in profit or loss. However, non-monetary items that are measured on a historical cost basis are translated using the exchange rate at the date of the transaction.

2) Classification of current and non-current assets and liabilities

A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:

- a) Assets arising from operating activities that are expected to be realized or consumed, or are intended to be sold within the normal operating cycle;
- b) Assets held mainly for trading purposes;
- c) Assets that are expected to be realized within twelve months from the balance sheet date; and
- d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.

B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:

- a) Liabilities arising from operating activities that are expected to be paid off within the normal operating cycle;
- b) Liabilities arising mainly from trading activities;
- c) Liabilities that are to be paid off within twelve months from the balance sheet date; and
- d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date.

3) Financial assets and financial liabilities at fair value through profit or loss

A. Financial assets and financial liabilities at fair value through profit or loss are recognized and derecognized using trade date accounting while bond transactions are accounted for using settlement date accounting at fair value.

B. These financial instruments are subsequently remeasured and stated at fair value, and the gain or loss is recognized in profit or loss. The fair value of listed stocks, OTC stocks and closed-end mutual funds is based on the closing prices at the balance sheet date. The fair value of open-end mutual funds is based on the net asset value at the balance sheet date. The fair value of delisted (TSE and OTC) stocks and emerging stocks are based on the cost at the balance sheet date when the Company has no ability to exercise significant influence.

4) Available-for-sale financial assets

A. Equity securities and beneficiary certificates are accounted for using trade date accounting while debt securities are accounted for using settlement date accounting at fair value.

B. The financial assets are remeasured and stated at fair value or fundamental value derived

from a model evaluation and the gain or loss is recognized in equity. The fair value of listed stocks, OTC stocks, closed-end mutual funds and beneficiary certificates is determined based on the closing prices at the balance sheet date. The fair value of open-end mutual funds is based on the net asset value at the balance sheet date. The fair value of delisted (TSE and OTC) stocks and emerging stocks is based on the cost at the balance sheet date when the Company has no ability to exercise significant influence.

- C. If there is any objective evidence that the financial asset is impaired, a loss is recognized. Subsequent recovery of fair value is recognized in equity. Recovery of fair value of debt instruments is recognized in current operations.

5) Held-to-maturity financial assets

- A. Held-to-maturity financial assets are accounted for using settlement date accounting, and are stated initially at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.
- B. These financial assets are carried at amortized cost.
- C. If there is any objective evidence that the financial asset is impaired, a loss is recognized. Subsequent recovery of fair value is recognized in equity. Recovery of fair value of debt instruments is recognized in current operations.

6) Financial assets carried at cost

- A. Financial assets carried at cost are accounted for using trade date accounting, and are stated initially at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.
- B. If there is an indication of impairment, impairment loss should be recognized in profit or loss. Such impairment loss should not be reversed when the fair values of the asset subsequently increases.

7) Pecuniary, securities financing and securities borrowing & lending

- A. According to the Rules Governing Securities Finance Enterprises (RGSFE), margin loans primarily represent pecuniary financing to investors or refinancing to securities firms. Such loans are secured by the securities purchased by the investors, and the Company records these securities at par value under the memorandum accounts "securities held for collateral" and "liability for holding collateral securities", and are not included in the balance sheets.
- B. According to Article 10 of the RGSFE, margin loan investors must pay a certain percentage of the related stock market price themselves.
- C. Short sale stock loans represent securities financing effected by lending securities in custody that are received from margin loans, guarantee effects or borrowed securities. When the securities are lent to investors, the Company records the par value of the securities lent under the memorandum account "short sale stock loans". Additionally, according to Article 10 of

the RGSFE, the investors need to deposit an amount equal to a certain percentage of the proceeds from short sale stock financing as collateral with the Company. The proceeds are accounted for as "stock deposits". The Company deals with these securities at par value under the memorandum account "guarantee effects". The proceeds from sale of securities loaned, less any dealer's commission, financing commission and securities exchange tax, are held by the Company as collateral and recorded under "short sale proceeds payable".

- D. In accordance with SFC Ruling (88) Tai Tsai Cheng (4) No. 03452, when the securities financed by borrowers cease trading, or are delisted from the stock market, or are securities of the borrowers' credit accounts which are unable to be disposed of, the margin loans resulting from the securities financing will be recorded as "other receivables" or "overdue receivables" according to the result of negotiation or collection. Due to the insufficient margin percentage as collateral for a fall in stock price, the uncovered balance of the margin loan after disposing of the respective stocks was recorded as "overdue receivables".
- E. "Stock short sales" means investor borrowing stocks from a lender who owns the stocks, with the promise that the investor will return them later to the lender with same kind and same quantity of stocks. When stocks are borrowed, the Company records the par value of the borrowed stocks under the memorandum account "borrowed stocks". If the Company pays guarantee deposits for borrowing, it records "refundable guarantee deposits"; or if it provides collaterals with value equal to the stocks borrowed, it records the par value of the collaterals under the memorandum account "refundable collaterals". When stocks are lent, the Company records the par value of the lent stocks under the memorandum account "stock short sales". If the Company receives guarantee deposits for lending, it records "guarantee deposits received"; or if it receives collaterals with value equal to the stocks lent, it records the par value of the collaterals under the memorandum account "collaterals received".

8) Margin loans and other receivables

- A. Margin loans are claims resulting from the credit transactions. Other receivables are receivables other than margin loans. Margin loans and other receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment.
- B. The Company assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. A provision for impairment of financial asset is established when there is objective evidence that it is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. When the fair value of the asset subsequently increases and the increase can be objectively related to an event occurring after the impairment loss being recognized in profit or loss, the impairment loss shall be reversed to the extent of the loss previously recognized in profit or

loss. Such recovery of impairment loss shall not make the asset's carrying amount greater than its amortized cost without impairment loss being recognized. The recoveries of amounts are recognized in profit or loss.

9) Fixed assets, rental assets, and idle assets

- A. Fixed and rental assets are stated at cost. Interest incurred required to complete and prepare the asset for its intended use is capitalized.
- B. Depreciation is provided using the straight-line method based on the estimated economic useful lives of the assets plus one year as residual value. The estimated useful lives of major fixed assets range from 3~5 years, except for buildings which is 5~55 years.
- C. Major renewals and improvements are capitalized and depreciated accordingly. Maintenance and repairs are expensed when incurred.
- D. The rental payments on capital lease should be capitalized as leased assets and a lease liability should be recognized. All capital leased property should be depreciated. If the lease contract contains a bargain purchase option or allows the transfer of ownership at the end of the term, then the depreciation should be determined based on the leased property's useful economic life. Otherwise, the lease term is used. If the Company sells its property to others and immediately leases it back, the gain or loss resulting from the sale of leased property should be deferred using the "unearned gain or loss on sales-leaseback" account. The amortization of the unearned gain or loss on sales-leaseback depends on the nature of the lease. If the fair value of the leased property is smaller than its book value on disposal, then the Company should recognize the difference between the fair value and the book value as a loss in the current period.
- E. Fixed assets which are not used for operations are recorded as idle assets or leased assets based on the lower of net realizable value or book value, and any loss is recorded as non-operating expense.

10) Intangible assets

Intangible assets consist of computer software costs which are stated at cost and amortized over the estimated useful life of 3~5 years using the straight-line method.

11) Impairment of non-financial assets

The Company recognizes impairment loss when there is indication that the recoverable amount of an asset is less than its carrying amount. The recoverable amount is the higher of the fair value less costs to sell and value in use. When the impairment no longer exists, the impairment loss recognized in prior years shall be recovered.

12) Bonds payable

- A. The difference between the issue price and face value of convertible corporate bonds is accounted for as premium or discount which is required to be amortized over the period

from the date of issuance to maturity date using the interest method and is recorded as “interest expense”.

B. Significant differences between redemption and the book value are recognized as extraordinary gain or loss.

13) Pension plan

Under the defined benefit pension plan, net periodic pension costs are recognized in accordance with the actuarial calculations. Net periodic pension costs include service cost, interest cost, expected return on plan assets, and amortization of unrecognized net transition obligation and gains or losses on plan assets. Under the defined contribution pension plan, net periodic pension costs are recognized as incurred.

14) Income tax

A. Provision for income tax includes deferred income tax resulting from temporary differences, investment tax credits and loss carryforward. Valuation allowance on deferred tax assets is provided to the extent that it is more likely than not that the tax benefit will not be realized. Over or under provision of prior years’ income tax liabilities is included in current year’s income tax.

B. The additional 10% income tax on undistributed earnings of the Company is recognized as tax expense in the year the stockholders approve a resolution to retain the earnings.

C. From the year of 2003, according to Article 49 of the Financial Holding Company Act and Income Tax Act, the Company elects its parent company, Yuanta Financial Holding Co., Ltd., as the taxpayer to file the consolidated profit-seeking enterprise income tax returns. In addition to the consolidated income tax returns, the Company has to compute its income tax on an individual filing basis pursuant to R.O.C. SFAS No. 22, “Accounting for Income Taxes”, and records the tax receipts and tax payments arising from the consolidated income tax returns in the current period’s deferred income tax assets (liabilities), income tax payable (income tax refundable) and other receivables (payables) - affiliates of the Company’s financial statements.

15) Earnings per share

A. Basic earnings per share is calculated by dividing net income by the weighted average number of shares outstanding during the year after taking into consideration the retroactive effect of stock dividends and capital reserve capitalized.

B. The Company adopted the amended R.O.C. SFAS No. 24 “Earnings Per Share”, which requires the calculation of earnings per share by disclosing basic and diluted earnings per share if there are potential common stocks.

16) Share-based payment — employee compensation plan

In accordance with the “Regulations Governing The Transfer Of The Company’s Shares

Which Were Bought Back By The Company To Employees” as prescribed by the Company’s parent company - Yuanta Financial Holding Co., Ltd, all regular employees of the Company are entitled to parent company stock options. For treasury stocks of parent company reissued to employees as compensation, compensation cost is recognized using the fair value method, in accordance with EITF 96-266, “Accounting for Transfer Of Enterprise’s Treasury Stocks To Employees”, dated October 12, 2007, as prescribed by the R.O.C. Accounting Research and Development Foundation. The cost of the services received during the vesting period is measured based on the option pricing model at the grant date, and is amortized as payroll expenses during that period.

17) Employees’ bonus and directors’ and supervisors’ remuneration

Effective January 1, 2008, pursuant to EITF 96-052 of the Accounting Research and Development Foundation, R.O.C., dated March 16, 2007, “Accounting for Employees’ Bonus and Directors’ and Supervisors’ Remuneration”, the costs of employees’ bonus and directors’ and supervisors’ remuneration are accounted for as expenses and liabilities, provided that such a recognition is required under legal or constructive obligation and those amounts can be estimated reasonably. However, if the accrued amounts for employees’ bonus and directors’ and supervisors’ remuneration are significantly different from the actual distributed amounts resolved by the stockholders at their annual meeting subsequently, the difference shall be recognized as gain or loss in the year of distribution. The Company calculates the number of shares of employees’ stock bonus based on the net asset value in the latest audited financial statements.

18) Revenues, costs and expenses

Revenue is recognized when it is realized or realizable and it is earned. Cost associated with revenue is recognized as incurred and expense is recognized as incurred on an accrual basis.

19) Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the management to make estimates and assumptions that affect the amounts of assets and liabilities and the disclosures of contingent assets and liabilities at the date of the financial statements and the amounts of revenues and expenses during the reporting period. Actual results could differ from those assumptions and estimates.

20) Settlement date accounting

When settlement date accounting is used, any change in the fair value of the asset during the period between the trade date and the settlement date is not recognized for assets carried at cost or amortized cost. For financial assets and financial liabilities at fair value through profit or loss, the change in fair value is recognized in profit or loss. For available-for-sale financial assets, the change in fair value is recognized directly in equity.

21) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is responsible for allocating resources and assessing performance of the operating segments.

In accordance with R.O.C. SFAS No. 41, "Operating Segments", segment information is disclosed in the consolidated financial statements rather than in the separate financial statements of the Company.

3. CHANGES IN ACCOUNTING PRINCIPLES

1) Margin loans and other receivables

Effective January 1, 2011, the Company adopted the amendments to R.O.C. SFAS No. 34, "Financial Instruments: Recognition and Measurement". A provision for impairment (bad debts) of margin loans and other receivables is recognized when there is objective evidence that the receivables are impaired. This change in accounting principle had no significant effect on net income and earnings per share for the year ended December 31, 2011.

2) Operating segments

Effective January 1, 2011, the Company adopted the newly issued R.O.C. SFAS No. 41, "Operating Segments" in place of the original R.O.C. SFAS No. 20, "Segment Reporting". In accordance with such standard, the Company restated the segment information for 2010 upon the first adoption of R.O.C. SFAS No. 41. This change in accounting principle had no significant effect on net income and earnings per share for the years ended December 31, 2011 and 2010.

10) PENSION PLAN

The Company has a defined benefit pension plan in accordance with the Labor Standard Law (the “Law”), covering all regular employees’ service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. The Company provides benefits based on an employees’ length of service and average salary or wage of the last 6 months prior to retirement. Two units are accrued for each year of service for the first 15 years and one unit for each additional year of service thereafter, with a maximum of 61 units. The Company contributes monthly an amount equal to 8% of employees’ monthly base salaries and wages to an independent fund with the Bank of Taiwan, the trustee.

The following sets forth the pension information based on the actuarial report:

1. Actuarial assumptions for 2011 and 2010: discount rate of 1.90% and 1.75%, expected return rate on plan assets of 1.90% and 1.75% and rate of compensation both increase by 2.5%. Under the actuarial method, unrealized transition asset is amortized over 15 years.

2. The reconciliation of the plan funded status:

	December 31,	
	2011	2010

Service cost	\$ 4,117	\$ 3,992
Interest cost	2,515	2,975
Actual return on plan assets	( 388)	( 367)
Net periodic pension cost	\$ 6,244	\$ 6,600

Effective July 1, 2005, the Company established the defined contribution plan for employees with R.O.C nationality. The employees have the option to participate in the New Plan. Under the New Plan, the Company contributes monthly an amount not less than 6% of employees' salaries to the employees' personal pension accounts with the "Bureau of Labor Insurance". Benefits accrued under the New Plan are portable upon termination of employment. The total pension expenses amounted to \$2,171 and \$2,198 under the New Plan for the years ended December 31, 2011 and 2010, respectively.

11) COMMON STOCK (Par value per share is expressed in New Taiwan Dollars)

- A. The Board of Directors (acting on behalf of the stockholders) of the Company on August 30, 2011 resolved to reduce the capital of \$3,800,000. The capital reduction has been approved by the competent authorities on October 12, 2011, and the effective date of reduction was set on November 25, 2011. The capital reduction had been registered.
- B. In accordance with the resolution adopted by the Board of Directors (acting on behalf of the stockholders) on April 26, 2011, the Company decided to capitalize profit appropriation of \$3,200,000 and capital reserve of \$600,000. The capitalization has been approved by the competent authorities and had been registered.
- C. The Board of Directors (acting on behalf of the stockholders) of the Company on November 23, 2010 resolved to reduce the capital of \$16,500,000. The capital reduction has been approved by the competent authorities on January 10, 2011, and the effective date of reduction was set on January 11, 2011.
- D. In accordance with the resolution adopted by the Board of Directors (acting on behalf of the stockholders) on October 26, 2011, the Company decided to capitalize profit appropriation of \$4,400,000 and capital reserve of \$1,600,000. The capitalization had been approved by the competent authorities and had been registered.
- E. As of December 31, 2011 and 2010, the Company's authorized capital was both \$22,500,000. The Company's outstanding common stocks were 600,000 thousand shares, including 280,000 thousand and 2,250,000 thousand shares, including 1,050,000 thousand which were raised through the private placement as of December 31, 2011 and 2010, respectively, with a par value of \$10 (in dollars) per share.

12) CAPITAL RESERVE

- A. Under the revised Company Law, up to 10% of the total amount of capital reserve may be used to cover accumulated deficit except for the paid-in capital in excess of par from the issuance of common stock and treasury stock which may be used to increase capital provided the amount to be capitalized does not exceed 10% of the balance.
- B. For the related explanations regarding additional paid-in capital – stock option, please refer to Note 4(14).

13) RETAINED EARNINGS

- A. Under the Company's Articles of Incorporation, the current year's earnings, if any, shall first be used to pay all taxes and offset prior year's operating losses and then 30% of the remaining amount shall be set aside as legal reserve, and special reserve shall be set aside according to relevant regulations. Appropriation of the remainder shall be proposed by the Board of Directors and resolved by the stockholders. The bonus distributed to the employees and remuneration paid to the directors and supervisors should account for 0% and 0.1%~0.5%, respectively, of the total distributed amount.
- B. Beginning in 1994, the Company retained 30% of its annual net income as legal reserve as per Ministry of Finance regulations. This reserve can only be used to offset any accumulated deficit or be transferred to share capital. The reserve cannot be used to distribute cash dividends.
- C. Pursuant to the Jin-Guan-Zheng (1) Letter No. 0950000507, effective January 1, 2007 of the Financial Supervisory Commission, Executive Yuan, in relation to the appropriation of the preceding year's earnings, a public company shall set aside an amount of special reserve which is equal to the amount of "unrealized loss on financial instruments" under the stockholders' equity.
- D. The Board of Directors (acting on behalf of the stockholders) of the Company on April 26, 2011 and March 30, 2010 resolved to appropriate the employees' bonus and remunerations of 2010 and 2009, respectively. The details are as follows:

	2010		2009	
	Amount	Dividends per share (in dollars)	Amount	Dividends per share (in dollars)
Legal reserve	\$ 557,069	\$ -	\$ 544,110	\$ -
Special reserve	-	-	( 290,410)	-
Cash dividends	1,299,828	2.16	1,559,999	0.95

The resolution, when adopted by the Board of Directors and shareholders will be available on the website of the "Market Observation Post System" of the Taiwan Stock Exchange Corporation.

E. The appropriation of the Company's 2011 earnings as proposed by the Board of Directors on February 29, 2012 is as follows:

	2011	
	Amount	Dividends per share (in dollars)
Legal reserve	\$ 229,333	
Special reserve	97,643	
Cash dividends	437,466	\$ 0.73

F The estimated amount of employees' bonus for 2011 and 2010 were \$1,164 and \$4,159, respectively. This was based on a certain percentage (as prescribed by the Company's Articles of Incorporation) of net income in this year after taking into account the legal reserve and other factors. The actual distribution of employees' bonus and directors' and supervisors' remuneration of 2010 were in agreement with those amounts recognized in the 2010 financial statements.

14) SHARE-BASED PAYMENT - EMPLOYEE COMPENSATION PLAN

A. As of December 31, 2011, the Company's share-based payment transactions are set forth below:

Liabilities:			
Financial liabilities with fair value equal to book value	6,059,597	-	6,059,597
Bonds payable	5,000,000	-	5,101,887

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

- A) For short-term instruments, the fair values were determined based on their carrying values because of their short maturities. This valuation method can be applied to such asset accounts as cash and cash equivalents, margin loans, other receivables (consolidated income tax receivable is not included), overdue receivables (excluding income tax payable), short-term borrowings, stock deposits, short sale proceeds payable, other payables, stock deposits, deposits-in of securities borrowing & lending, lease payable, and accrued pension liabilities.
- B) Financial assets at fair value through profit or loss – current: the market values of listed stocks are determined by the closing price on the balance sheet date. The fair values of beneficiary certificates are determined by the net asset values on the balance sheet date. The market prices of convertible bonds are determined by the last trading day. The market prices of government bonds are determined by the value on the balance sheet date.
- C) Available-for-sale financial assets – current are the beneficiary securities of financial asset securitization. The fair value is provided by the securities firm.
- D) For held-to-maturity financial assets, the fair value was based on active quoted market price. If the market for a financial instrument is not active, an entity establishes fair value by using a valuation technique.
- E) The fair values of deposits-out at the balance sheet date were valued at book value since the impact of discount rates is insignificant.
- F) The fair value of corporate bonds is based on the present value of expected cash flow amount. The discount rate is the market interest rate of corporate bonds with the same credit rating.

3) Information of interest rate change risk

The financial assets measured at fair value with interest rate fluctuations are \$1,080,121 and \$1,095,981 in 2011 and 2010, respectively. The financial liabilities are \$2,500,000 and \$5,000,000 in 2011 and 2010, respectively. The financial liability positions with interest rate risk are \$109,000 and \$0, respectively.

4) Information of financial risk

A) Market risk

The financial assets held by the Company includes stocks, open-ended funds, convertible bonds, government bonds and financial debentures. With the exception of unlisted stocks and bond investments in non-active markets, the values of the financial assets held are subject to changes in market rates or prices. In order to manage market risk, the Company only trades with those securities investment trust companies with good reputation.

B) Exchange rate risk

The Company conducts certain businesses that involves other non-functional currencies. Information on non-functional currency assets and liabilities that may be significantly affected by fluctuations in the foreign exchange rate are set forth below:

C) Credit risk

- a) The Company engages in pecuniary financing facilities for trading of listed securities. To reduce the credit risk, the Company follows the rules established by the Taiwan Stock Exchange Corp. and the GreTai Securities Market and sets its own internal policies and procedures.
- b) Credit risk occurs when the counterparty of financial instrument transaction defaults. Transaction counterparties are limited to high-credit-quality financial institutions; therefore, the possibility of default by counterparties is remote. The Company has policies that limit the amount of credit exposure to any financial institution based on their credit rating; accordingly, there is no significant credit risk. The maximum loss to the Company is the total contract amount of financial assets mentioned above which have positive fair value at the balance sheet date.

D) Liquidity risk

- a) The Company has adequate operating capital to fulfill all contractual obligations. Thus, there is no significant liquidity risk.
- b) The financial assets held by the Company are all transacted in the active market, with the exception of unlisted stocks, bond investments in non-active market, and held-to-maturity financial assets. Thus, these financial assets can be readily sold at the prices close to their fair value. Therefore, the liquidity risk is not significant.
- c) Due to uncertain transaction terms and different types of financial instruments, the maturity or interest rate of financial assets and financial liabilities usually cannot fully match with each other. If the gap increases, it will likely result to a gain or loss. However, the Company has policies in place to minimize the potential gaps.

E) Cash flow risk arising from interest rate change

The short-term liabilities borrowed by the Company are priced at fair market value. The rate of the short-term liabilities will be affected by a change in market rate.

F) The structure and policy of risk management

In order to manage the risk faced by the Company, internal rules for the day-to-day operations are set, the information system is computerized and a weekly meeting is held by the team members of the risk management. In order to have reliable information, the Company set up a risk management center with other subsidiaries of the group.

B. Material differences that may arise between current accounting policies used in the preparation of financial statements and IFRSs and “Rules Governing the Preparation of Financial Statements by Securities Issuers” that will be used in the preparation of financial statements in the future:

The Company uses the IFRSs already ratified currently by the Financial Supervisory Commission and the “Rules Governing the Preparation of Financial Statements by Securities Issuers” that will be applied in 2013 as the basis for evaluation of material differences in accounting policies as mentioned above. However, the Company’s current evaluation results may be different from the actual differences that may arise when new issuances of or amendments to IFRSs are subsequently ratified by the Financial Supervisory Commission or relevant interpretations or amendments to the “Rules Governing the Preparation of Financial Statements by Securities Issuers” come in the future.

Material differences identified by the Company that may arise between current accounting policies used in the preparation of financial statements and IFRSs and “Rules Governing the Preparation of Financial Statements by Securities Issuers” that will be used in the preparation of financial statements in the future are set forth below:

(1) Functional currency

Pursuant to current accounting standards in the R.O.C., as the Company is not a foreign company, it does not need to determine its functional currency.

(2) Financial assets: equity instruments

In accordance with the amended “Rules Governing the Preparation of Financial Statements by Securities Issuers”, dated July 7, 2011, unlisted stocks and emerging stocks held by the Company should be measured at cost and recognized in “Financial assets carried at cost”. However, in accordance with IAS 39, “Financial Instruments: Recognition and Measurement”, investments in equity instruments without an active market but with reliable fair value measurement (i.e. the variability of the estimation interval of reasonable fair values of such equity instruments is insignificant, or the probability for these estimates can be made reliably) should be measured at fair value.

(3) Investment property

In accordance with current accounting standards in the R.O.C., the Company’s property that is leased to others is presented in ‘Other assets’ account. In accordance with IAS 40, “Investment Property”, property that meets the definition of investment property is classified and accounted for as ‘Investment property’.

#### (4) Pensions

- (i) The discount rate used to calculate pensions shall be determined with reference to the factors specified in R.O.C. SFAS 18, paragraph 23. However, IAS 19, “Employee Benefits”, requires an entity to determine the rate used to discount employee benefits with reference to market yields on high quality corporate bonds that match the currency at the end day of the reporting period and duration of its pension plan; when there is no deep market in corporate bonds, an entity is required to use market yields on government bonds (at the end day of the reporting period) instead.
- (ii) In accordance with current accounting standards in the R.O.C., the unrecognized transitional net benefit obligation should be amortized on a straight-line basis over the average remaining service period of employees still in service and expected to receive benefits. However, in accordance with IAS 19, “Employee Benefits”, the unrecognized transitional net benefit obligation should be amortized on a straight-line basis within 5 years after adoption - recognized as an expense immediately at the date of adoption.
- (iii) In accordance with current accounting standards in the R.O.C., the excess of the accumulated benefit obligation over the fair value of the pension plan (fund) assets at the balance sheet date is the minimum amount of pension liability that is required to be recognized on the balance sheet (“minimum pension liability”). However, IAS 19, “Employee Benefits”, has no regulation regarding the minimum pension liability.
- (iv) In accordance with current accounting standards in the R.O.C., actuarial pension gain or loss of the Company is recognized in net pension cost of current period using the ‘corridor’ method. However, IAS 19, “Employee Benefits”, requires that actuarial pension gain or loss should be recognized immediately in other comprehensive income.

#### (5) Employee benefits

- (i) The current accounting standards in the R.O.C. do not specify the rules on the cost recognition for accumulated unused compensated absences. The Company recognizes such costs as expenses upon actual payment. However, IAS 19, “Employee Benefits”, requires that the costs of accumulated unused compensated absences should be accrued as expenses at the end of the reporting period.

- (ii) The current accounting standards in the R.O.C. do not specify the rules on the recognition of other long-term employee benefits other than pensions. However, IAS 19, “Employee Benefits”, requires that the costs of other long-term employee benefits other than pensions should be recognized as expenses as the employees render service.

(6) Income taxes

- (i) In accordance with current accounting standards in the R.O.C., a deferred tax asset or liability should, according to the classification of its related asset or liability, be classified as current or noncurrent. However, a deferred tax asset or liability that is not related to an asset or liability for financial reporting, should be classified as current or noncurrent according to the expected time period to realize or settle a deferred tax asset or liability. However, under IAS 1, “Presentation of Financial Statements”, an entity should not classify a deferred tax asset or liability as current.
- (ii) In accordance with current accounting standards in the R.O.C., when evidence shows that part or whole of the deferred tax asset with 50% probability or above will not be realized, an entity should reduce the amount of deferred tax asset by adjusting the valuation allowance account. In accordance with IAS 12, “Income Taxes”, a deferred tax asset should be recognized if, and only if, it is considered highly probable that it will be realized.

Some of the above differences may not have a material effect on the Company in transition to IFRSs due to the exemption rules in IFRS 1, “First-time Adoption of International Financial Reporting Standards”, adopted by the Company.
